The Commission on the Future of the United States Aerospace Industry is a congressionally mandated commission as established in Section 1092 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001, public Law 106-398. The Commission was formed to study the future of the United States aerospace industry in the global economy, particularly in relationship to United States national security; and to assess the future importance of the domestic aerospace industry for the economic and national security of the United States.
